INTRODUCTION

TRANSFORMING GLOBAL PAYMENTS

Crossli is reimagining the world of cross-border payments by merging fiat and cryptocurrency transactions on a unified platform. Our mission is to create a borderless financial world, where individuals and businesses can transfer funds with ease, speed, and security, integrating the power of blockchain with everyday finance.

TECHNOLOGY AND INFRASTRUCTURE

ADVANCED FINANCIAL TECHNOLOGY FOR THE MODERN ERA

Crossli operates on a secure, scalable infrastructure combining AWS, Blockchain, and Microservices.

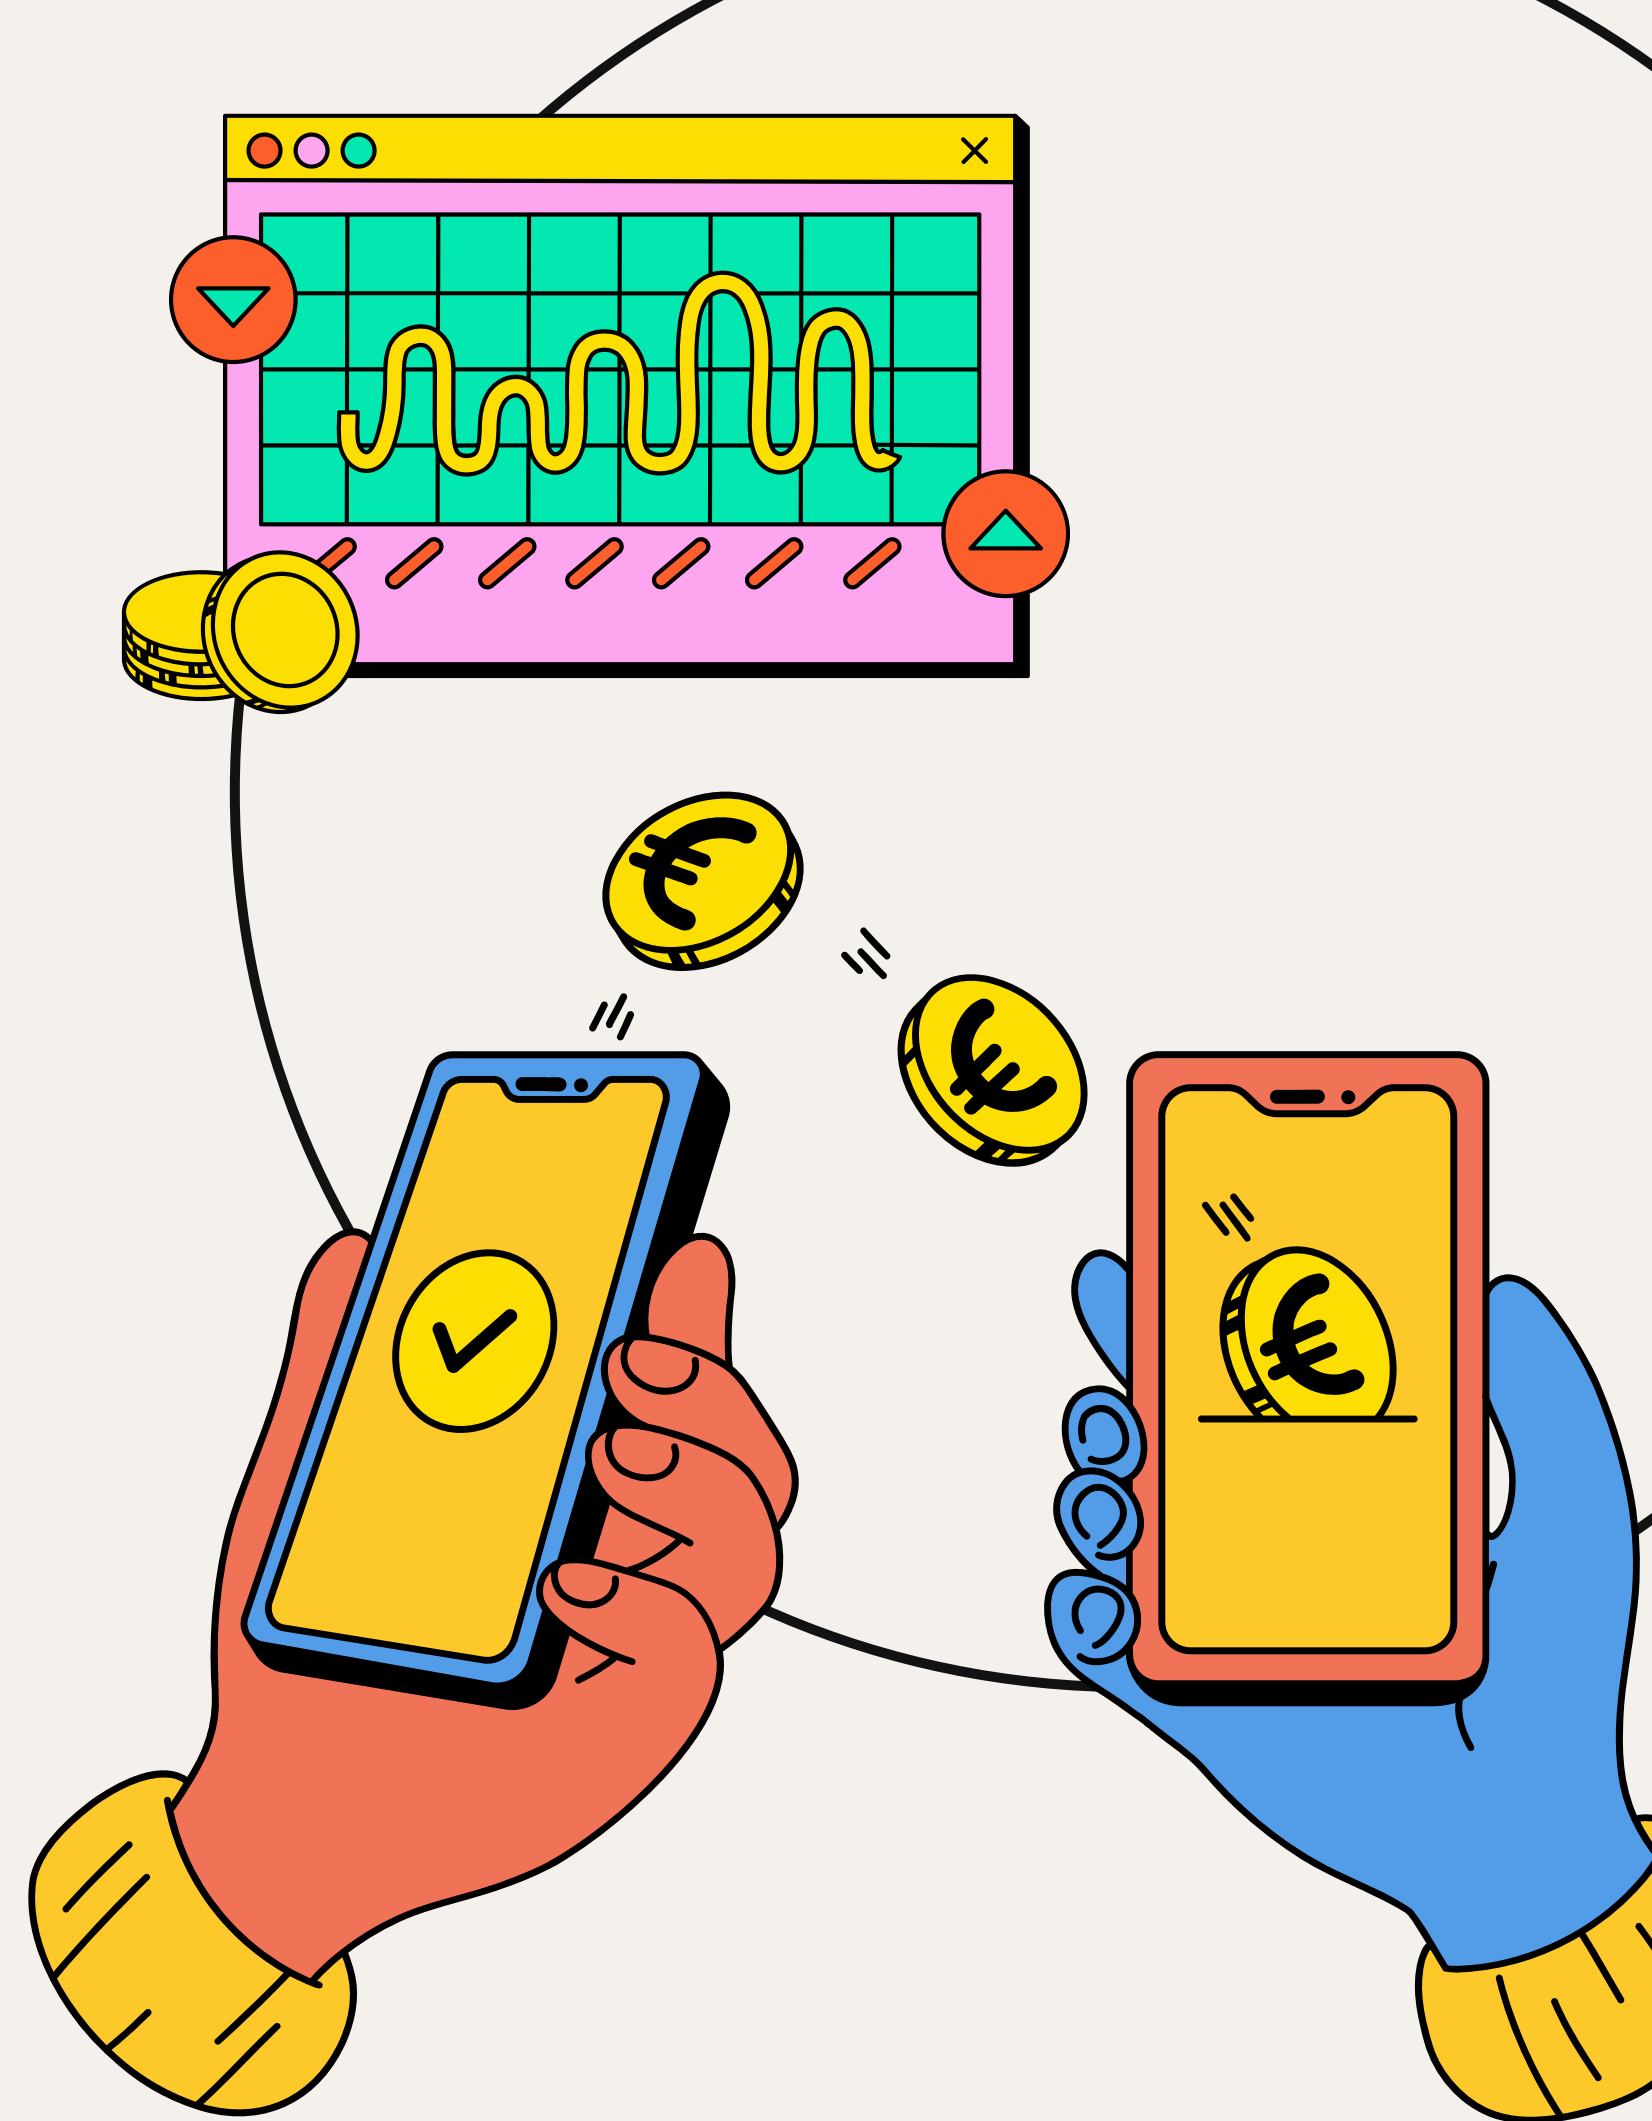

Our customizable API and payment gateway support instant fiat-to-crypto conversions, automated reconciliations, and strict global compliance.

This technology allows for high-speed, low-cost transactions, ensuring a seamless experience for users worldwide.

CORE FEATURES

KEY COMPONENTS OF CROSSLI

- Multi-Currency Payment Gateway: Real-time, global payment processing for fiat and crypto.
- Remittance Widget: Simplifying secure, cross-border transactions.
- Business Tools: Invoicing, detailed analytics, and account management for businesses.
- Revenue Share: Each remittance transaction fee is shared with \$XLI holders, fostering community engagement and growth.

USE CASES

WIDE-RANGING APPLICATIONS FOR CROSSLI

Crossli serves diverse industries by providing seamless payment solutions:

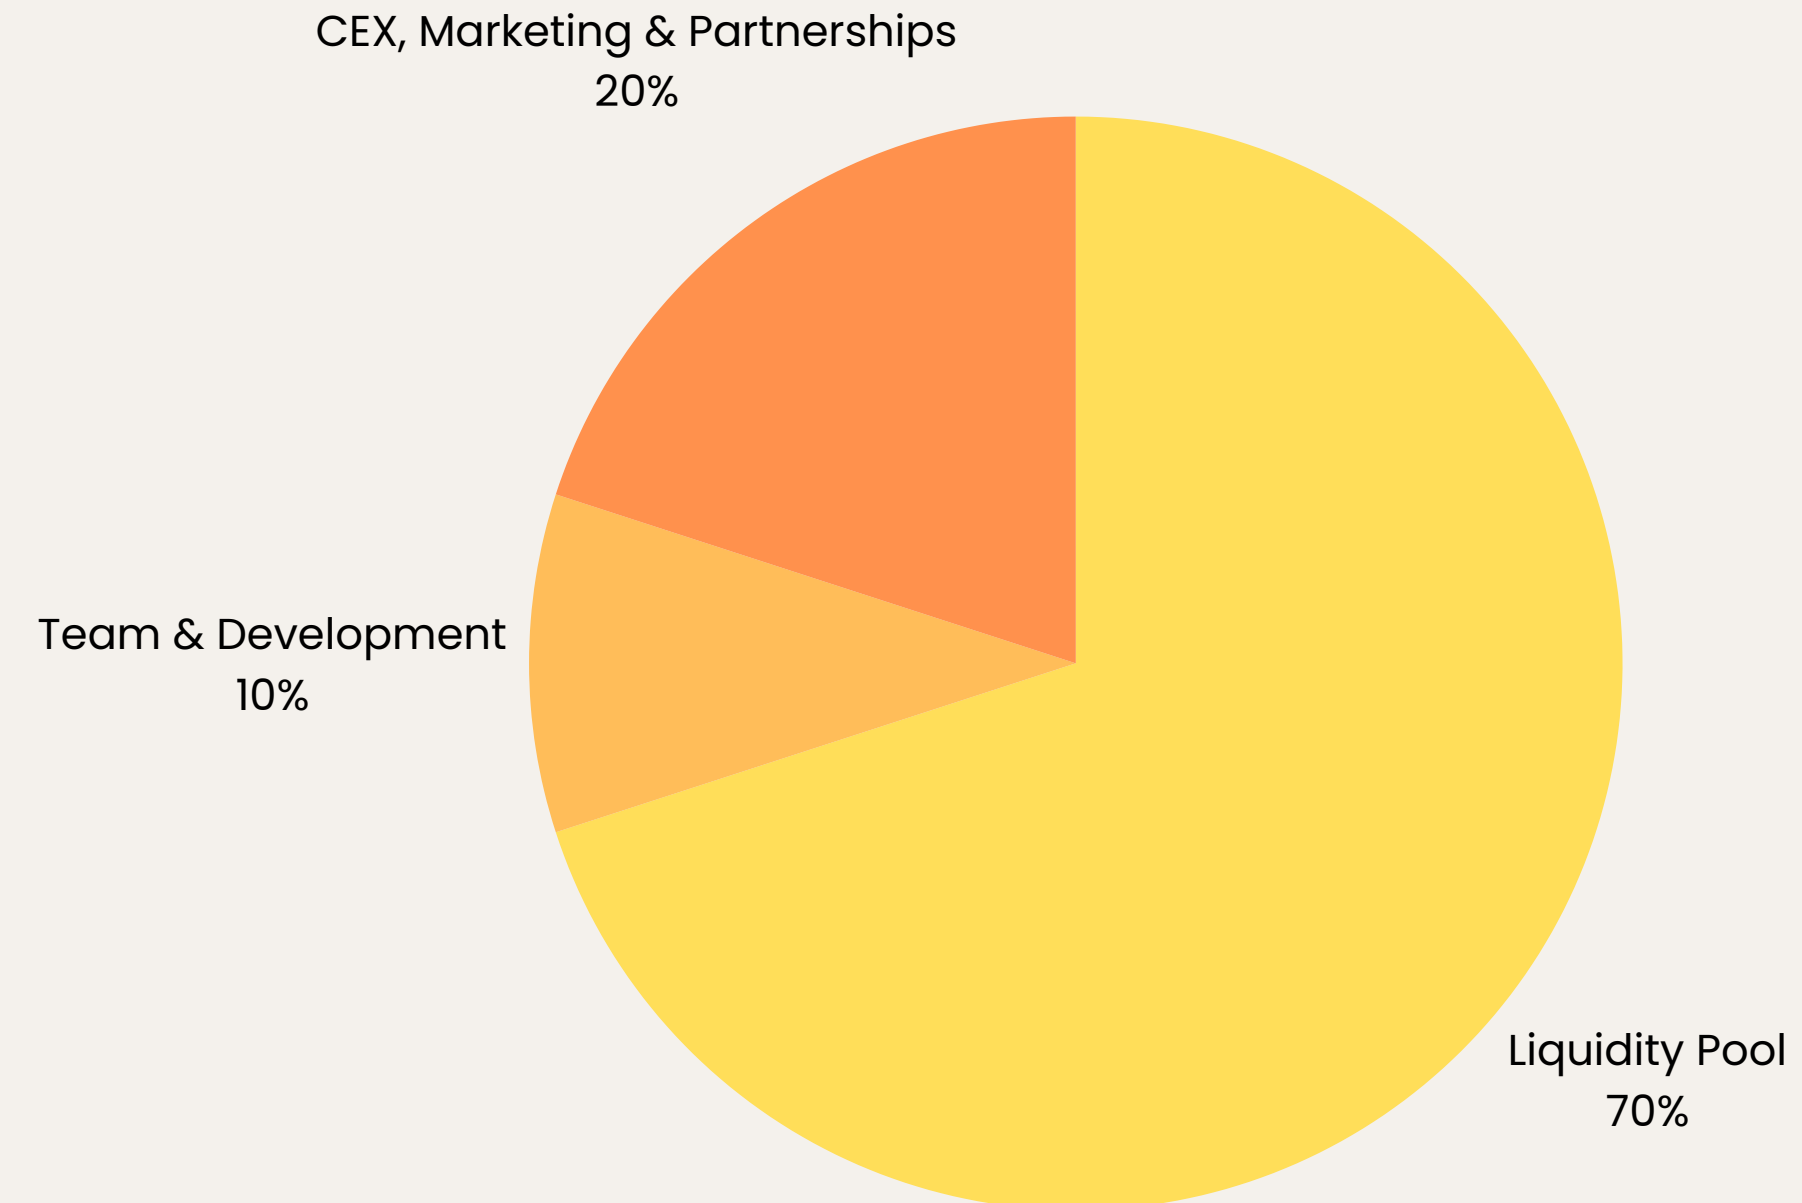

- **E-commerce:** Crypto and fiat checkout options for global accessibility.
- **Freelancing and Gig Economy:** Quick, reliable cross-border payments.
- **Subscription Services:** Comprehensive invoicing and flexible payment methods for recurring services.

TOKENOMICS

The \$XLI token powers the Crossli ecosystem, enabling seamless transactions and rewarding platform engagement:

- **Supply:** Fixed total and circulating supply with a strategic release schedule.
- **Transaction Fees:** A small tax (0.5%) on transactions helps fuel platform development and sustainability.
- **Revenue Sharing:** 50% share of remittance transaction fees are distributed to \$XLI holders, aligning incentives and promoting long-term value.

\$XLI: POWERING THE CROSSLI ECOSYSTEM

TOKENIZATION

ASSET TOKENIZATION

Transform any asset into liquid, tradeable digital tokens. From real estate to commodities, unlock unprecedented liquidity for previously illiquid assets.

- Fractional ownership
- 24/7 trading
- Global accessibility
- Reduced intermediaries

TOKENIZATION

CROSS-BORDER LIQUIDITY

Break down traditional barriers with tokenized currencies that flow seamlessly across borders, enabling instant settlement and unprecedented financial mobility.

- Instant settlements
- Lower costs
- Enhanced transparency
- Multi-currency support

TOKENIZATION

SMART CONTRACT SECURITY

Every tokenized transaction is governed by immutable smart contracts, ensuring trustless execution and eliminating counterparty risk.

- Automated execution
- Reduced fraud
- Transparent operations
- Programmable compliance

TOKENIZATION

DECENTRALISED FINANCE INTEGRATION

Connect your tokenized assets to the broader DeFi ecosystem, enabling yield farming, lending, and sophisticated financial strategies.

- Yield optimization
- Lending protocols
- Governance participation
- Portfolio automation

WHY TOKENIZATION?

LIGHTNING SPEED

Deals that may take days or a week to resolve can be done instantaneously through tokenized assets and smart contracts.

TRILLION DOLLAR MARKET

Various financial services providers project that tokenization could generate trillions of dollars in new value this decade.

GLOBAL ACCESS

Tokenization could allow investors to gain access to markets previously closed to them, democratizing financial participation worldwide.
